Total	____ feeds · ____ ml/oz	____ hrs sleep	____ / ____	

First box = wet, second = dirty. Write it down straight away: at night you really will not remember later.

Made with **Nuvo** · nuvoapp.nl

How to fill it in

Example and tips

Example

Time	Feed	Sleep	Diaper	Note
6:40 am	Breast L, then R		wet	Woke up happy
8:15 am		8:15 – 9:50		In the crib
10:00 am	Bottle 4 oz		wet + dirty	
1:30 pm	Breast R	1:50 – 3:10	wet	Vitamin D given
3:10 am	Bottle 3 oz	3:30 – 6:30	wet	Back to sleep quickly

Tips

- Keep a pen and the log where you feed or change, so you fill it in right away.
- For breastfeeding, note which side you ended on; then you know where to start next time.
- At the end of the day, add up the feeds, hours of sleep and wet diapers. After a few days, the rhythm shows.
- Bring it to your paediatrician or health visitor: questions like “how often does she feed?” and “how much does he sleep?” are then easy to answer.

Prefer your phone?

Nuvo does the same with one gesture on the wheel, even one-handed at night. Your partner can follow along, encrypted, and you turn it into a PDF in one tap. Search for “Nuvo” in the App Store.
